### **DETAILED ACTION**

## Response to Amendment

- The Amendment submitted on December 12, 2005, has been entered. Claims 13 38, 47 54, 56, and 77 86 have been cancelled. Claims 55, 88, and 89 have been amended.
   Therefore, the pending claims are 1 12, 39 46, 55, 57 76, and 87 89. Claims 1 12, 39 46, 60 76, and 87 are withdrawn from consideration as being drawn to a nonelected invention.
- 2. The 35 USC 112 1<sup>st</sup> paragraph rejection of claim 89 is withdrawn since the claim has been amended to remove the language which excluded the stiffness treated prepreg ply from being in contact with the honeycomb core.
- 3. The amendment to claims 55 and 88 is sufficient to overcome the 35 USC 102/103 rejection based on Corbett et al. (5,895,699) since Corbett et al. fails to teach placing a prepreg layer in a position contacting the honeycomb core or between the stiffness-treated prepreg ply and the honeycomb core. However, a new rejection is set forth below.

## Claim Rejections - 35 USC § 102/103

- 4. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
- 5. Claims 55, 57 59, 88, and 89 are rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Kain, Jr. (6,180,206).

Kain, Jr. discloses a honeycomb composite comprising a prepreg ply adjacent the honeycomb core to reduce core crush problems (column 3, lines 19-23). Further, Kain, jr. discloses that known honeycomb composite structures comprising outer face prepreg skins, a honeycomb core, a barrier film, a film adhesive layer, and a scrim-supported film adhesive layer

Art Unit: 1771

wherein the barrier layer and the film layers are between the honeycomb core and prepreg skin layers (column 4, lines 17 – 60). These structures have increased slippage between the barrier film and the honeycomb core resulting in increased core crush problems (column 4, lines 60 – 68). Kain, Jr. discloses that his invention includes a prepreg ply, such as woven fiberglass fabric impregnated with epoxy directly adjacent to both sides of the honeycomb core (column 7, lines 43 – 68). This layer is a full prepreg layer which covers the entire surface of the core (column 8, lines 35 – 40). Thus, Kain, Jr. discloses the honeycomb core with prepreg plies directly contacting the honeycomb core. The composite structure also includes an outer laminate layer of fiber-reinforced matrix resin, adjacent to a barrier film adhesive, which is adjacent to the prepreg ply contacting the honeycomb core (claim 3). Thus, the outer laminate layer of a fiber-reinforced matrix resin and the barrier adhesive correspond to the applicant's stiffness treated fabric comprising the plurality of fibers, polymeric material, and resin system.

Although Kain, Jr. does not explicitly teach the limitations of stiffness value of the prepreg layers or the frictional resistance of the prepreg layers, it is reasonable to presume that said limitations are inherent to the invention. Support for said presumption is found in the use of similar materials (i.e. prepregs made from fabrics including a polymeric material disposed on at least some of the fibers and a second resin system) used to produce a prepreg layer in honeycomb composite structure. The burden is upon the Applicant to prove otherwise. *In re Fitzgerald*, 205 USPQ 594. In the alternative, the claimed frictional resistance would obviously have been provided by the process disclosed by Kain, Jr. Note *In re Best*, 195 USPQ 433, footnote 4 (CCPA 1977) as to the providing of this rejection under 35 USC 103 in addition to the

Art Unit: 1771

rejection made above under 35 USC 102. Therefore, claims 55, 57 – 59, 88, and 89 are rejected by Kain, Jr.

Page 4

### Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following references disclose modifying the resin content of a prepreg ply to improve the tackiness of the prepreg layer with respect to the adjacent layer: Goodrich et al. (4,213,930); Ozaki et al. (6,027,794); and Kishi et al. (6,429,157).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jenna-Leigh Befumo whose telephone number is (571) 272-1472. The examiner can normally be reached on Monday - Friday (8:00 - 5:30).

Application/Control Number: 09/317,409

Art Unit: 1771

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Terrel Morris can be reached on (571) 272-1478. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
